

## Statement of Work (SOW)

### Precision Cleaning and Calibration Services for KSC Flight & Ground Support Hardware

#### 1. Purpose

Kennedy Space Center (KSC) requires contractor support to perform precision cleaning and calibration of select mission-critical hardware.

#### 2. Contractor Requirements

The contractor shall:

- Perform precision cleaning in accordance with KSC-provided specifications, standards, and contamination-control requirements.
- Conduct calibration of gauges, load pins, and measurement hardware to KSC/NASA technical requirements.
- Return all cleaned/calibrated items with required certification, documentation, and traceable quality records.
- Follow KSC protocols for handling, packaging, contamination control, and clean-side transfer.
- Coordinate schedules, pickups, and deliveries with designated KSC personnel.
- Ensure no substitutions of soft goods or hardware; KSC will provide all specialized soft goods, O-rings, seals, and additional hardware required to complete cleaning/calibration.

#### 4. Government Furnished Materials (GFM)

KSC will supply:

- All specialized soft goods, seals, O-rings, gaskets, kits
- Any unique or proprietary hardware needed to support cleaning or calibration
- Any technical specifications and acceptance criteria applicable to each hardware category

#### 5. Deliverables

- Cleaned, calibrated hardware meeting KSC acceptance criteria

- Certification package for each item
- Status reporting and communication updates as coordinated with KSC identified coordinator
