

Locations #1-3

Locations to gain access to install on Cavern walls.

Locations #4

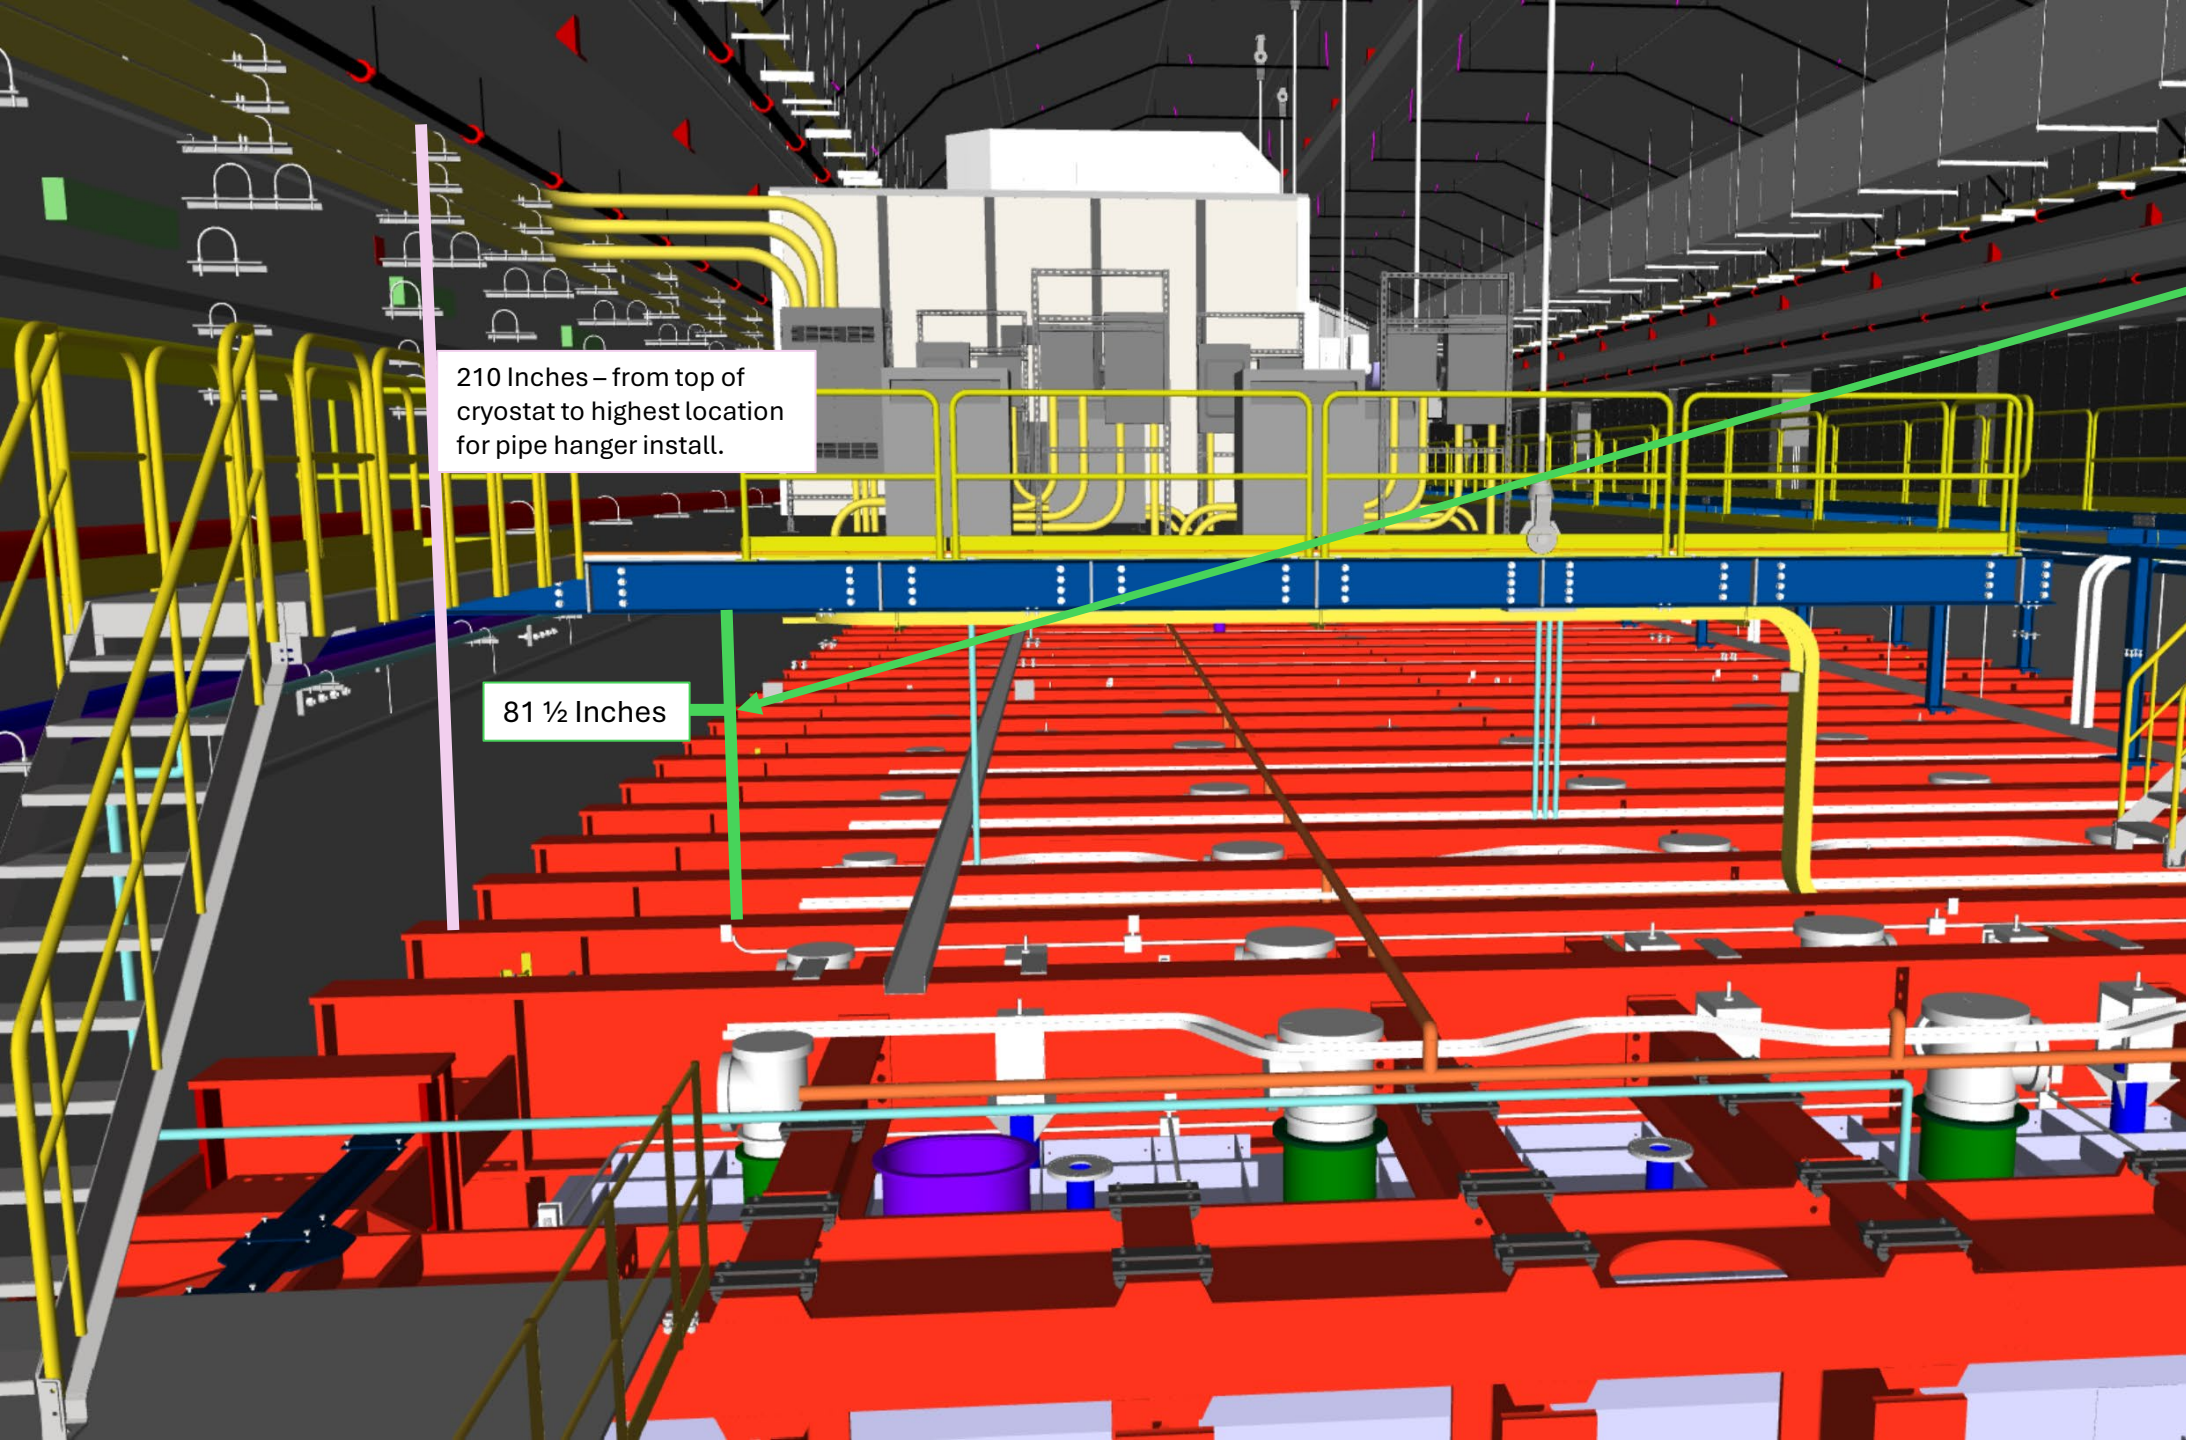

Location to install
support system

Installation
height of
Platform
from top of
cryogenic
beams.

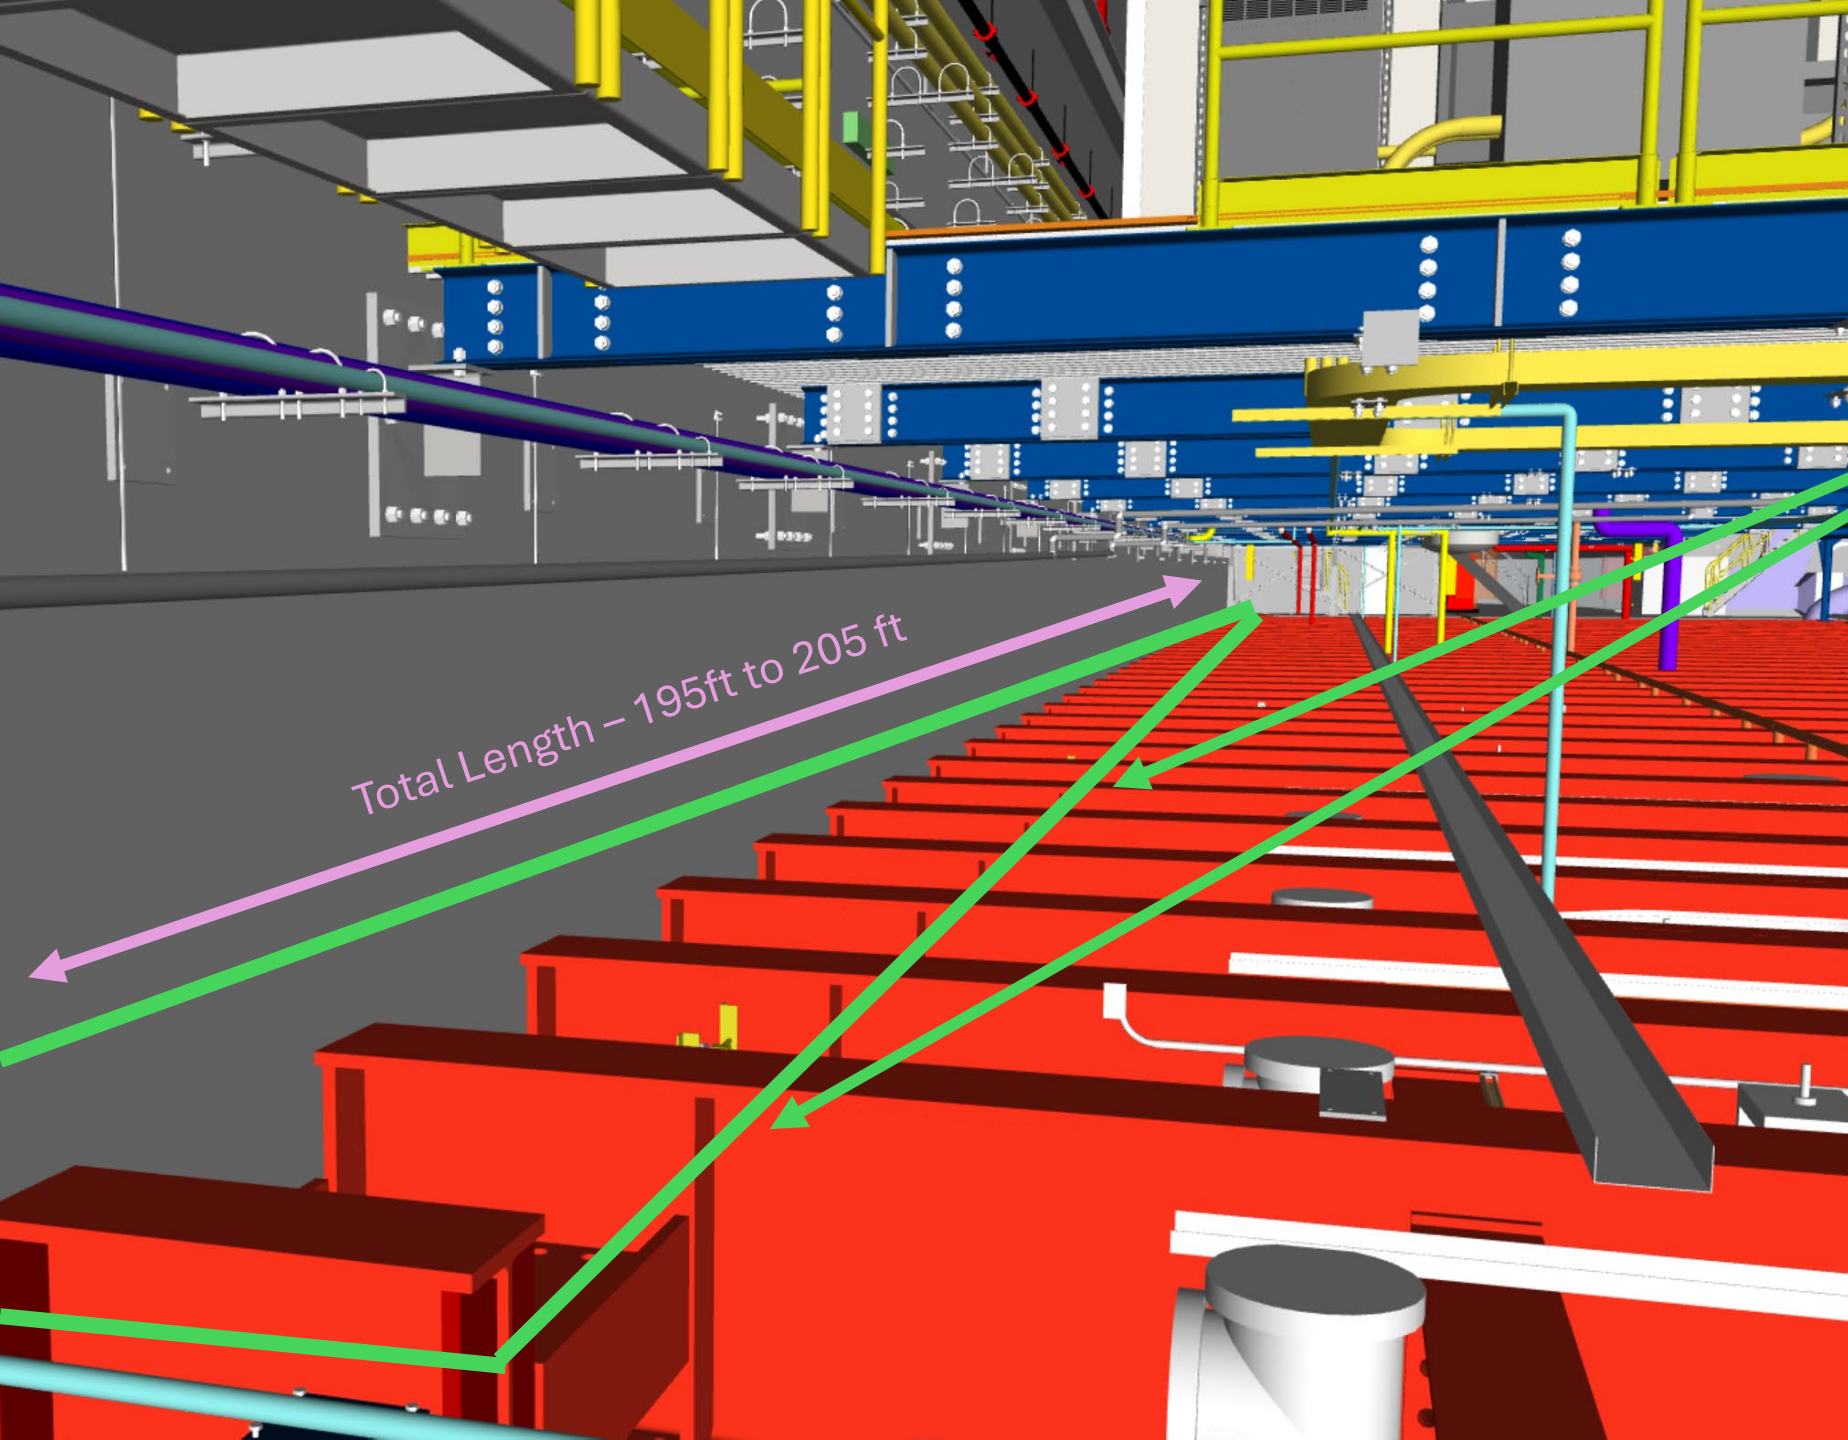

210 Inches – from top of
cryostat to highest location
for pipe hanger install.

81 ½ Inches

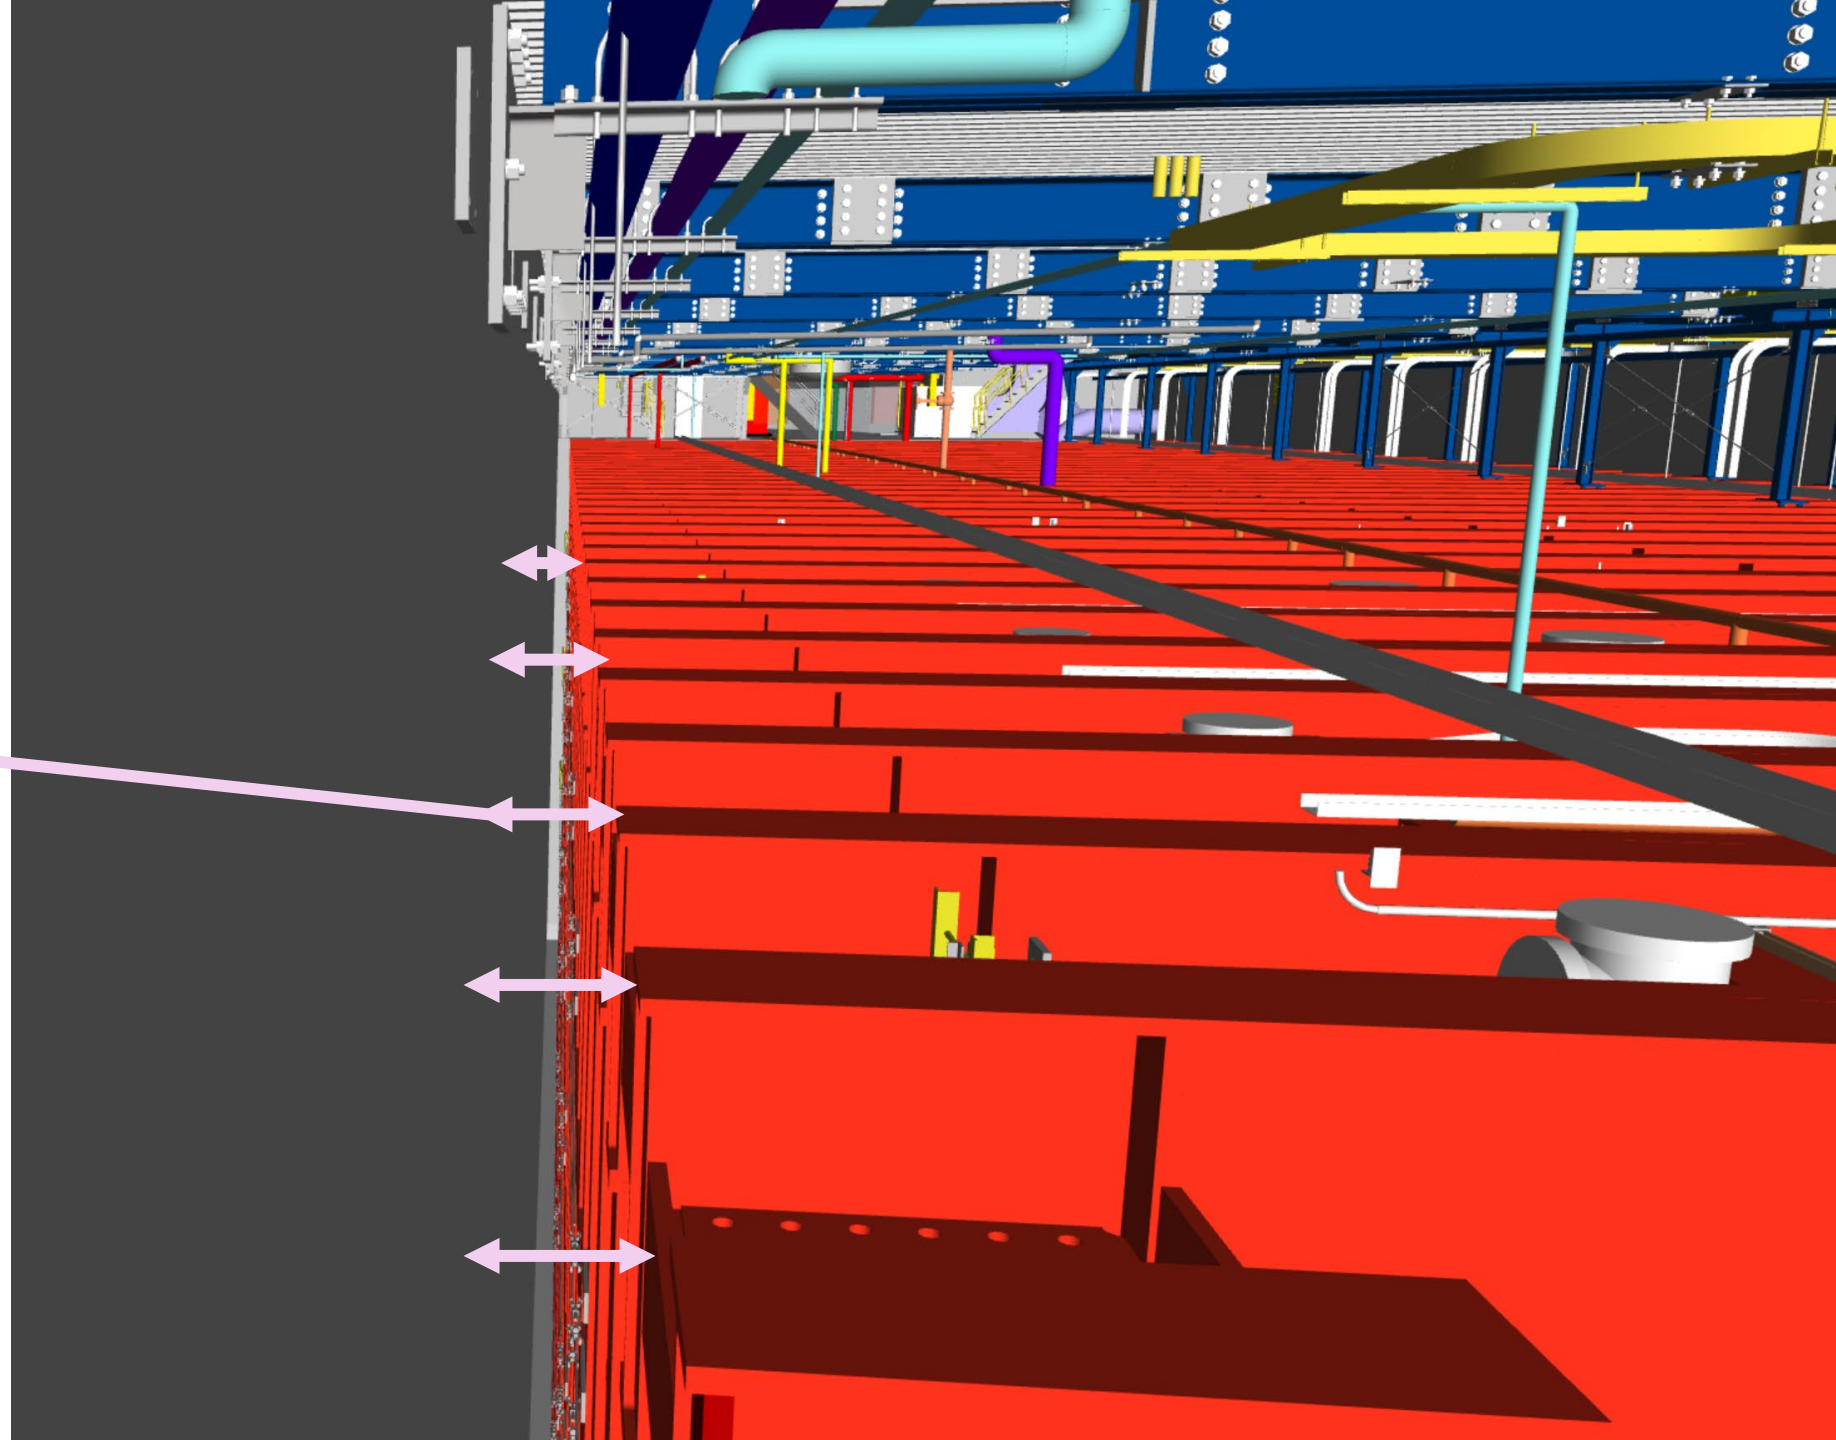

Locations #1-3

Full length walking platform, that cantilevers off the side of the cryostat to access anchor points on cavern wall. However, this walking platform will need to be anchored to the top of the cryostat.

Locations #1-3

Distance from side of cryostat to cavern north wall to gain access to anchor points = **1-2 ½ ft**, due to changes in the cavern wall.

Cavern Wall (Not Flat)

Distance from side of cryostat to cavern north wall to gain access to anchor points = **1-2 ½ ft**, due to changes in the cavern wall.

Sled system to anchor to top of cryostat beams and also able to move downline to continue install of platform.
