

**SECTION 22 10 01.02  
POLYVINYL CHLORIDE  
DRAIN WASTE AND VENT (PVC-DWV)  
PIPE AND FITTINGS**

| <b>Item</b>       | <b>Size</b> | <b>Description</b>                                                                                                                                                                                                                |
|-------------------|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pipe and Fittings | All         | Physical Characteristics: None.<br>Functional Characteristics: None.<br>Performance Characteristics: PVC-DWV<br>Schedule 40 nonpressure application, Class 12454B<br>conforming to ASTM D2665 and ANSI/NSF<br>Standard 14 system. |
| Joints            | All         | Physical Characteristics: None.<br>Functional Characteristics: None.<br>Performance Characteristics: Solvent cemented<br>conforming to ASTM D2855 except where<br>connection to equipment may require future removal.             |
| Solvent Cement    | All         | Physical Characteristics: None.<br>Functional Characteristics: None.<br>Performance Characteristics: As recommended by<br>the pipe and fitting manufacturer conforming to<br>ASTM D2564.                                          |

**END OF SECTION**
