(a) Definitions. As used in this clause—

Program participation means membership or participation in, or access or admission to: training, mentoring, or leadership development programs; educational opportunities; clubs; associations; or similar opportunities that are sponsored or established by the contractor or subcontractor.

Racially discriminatory diversity, equity, and inclusion (DEI) activities means disparate treatment based on race or ethnicity in the recruitment, employment (e.g., hiring, promotions), contracting (e.g., vendor agreements), program participation, or allocation or deployment of an entity's resources.

(b) In connection with the performance of work under this contract, the Contractor agrees as follows:

(1) The Contractor will not engage in any racially discriminatory DEI activities;

(2) The Contractor will furnish all information and reports, including providing access to books, records, and accounts, as required by the Contracting Officer, for purposes of ascertaining compliance with this clause;

(3) In the event of the Contractor's or a subcontractor's noncompliance with this clause, this contract may be canceled, terminated, or suspended in whole or in part, and the Contractor or subcontractor may be declared ineligible for further Government contracts;

(4) The Contractor will report any subcontractor's known or reasonably knowable conduct that may violate this clause to the Contracting Officer and take any appropriate remedial actions directed by the Contracting Officer; and

Critical Safety Items (September 2016)

CONDITIONS FOR EVALUATION AND ACCEPTANCE OF OFFERS FOR CRITICAL SAFETY ITEMS

(a) Definitions.

"Actual manufacturer" means an individual, activity, or organization that performs the physical fabrication processes that produce the deliverable part or other items of supply for the Government. The actual manufacturer must produce the part in-house. The actual manufacturer may or may not be the design control activity.

"Approved source" means a prime contractor or the actual manufacturer(s) cited in the procurement item description (PID). It does not include design control activities with no manufacturing capability.

"Critical safety item" (CSI) means a part, assembly, installation, or production system with one or more critical characteristics that, if not conforming to the design data or quality requirements, would result in an unsafe condition that could cause loss of, or serious damage to, the end item or major components, loss of control, or serious injury or death to personnel.

"Design control activity" means a contractor or Government activity having responsibility for the design of a given part, and for the preparation and currency of engineering drawings and other technical data for that part. The design control activity may or may not be the actual manufacturer.

"Exact product" and "alternate product" are defined in the provision at DLAD 52.217-9002 or Procurement Note L04, Conditions for Evaluation and Acceptance of Offers for Part Numbered Items.

"Prime contractor" means a contractor having responsibility for design control and/or delivery of a system/equipment such as aircraft, engines, ships, tanks, vehicles, guns and missiles, ground communications and electronics systems, and test equipment.

"Rebranding" means remarking, re-labeling, repackaging, or otherwise obscuring the marking of the approved source cited in the PID (i.e., the prime contractor or actual manufacturer).

(b) The item being acquired is a critical safety item (CSI). Given their vital importance and the catastrophic consequences that can result if they fail, procurement of these items requires the highest standards of oversight and verification.

(c) This clause applies only to offers of "exact product." Offers of "alternate product" will be evaluated in accordance with the clause at DLAD 52.217-9002 or Procurement Note M06. Offerors of Government surplus material must comply with the requirements in the clause at DLAD 52.211-9000 or Procurement Note C04 in addition to this clause, and surplus offers will be evaluated in accordance with the provision at DLAD 52.211-9003 or Procurement Note M05.

(d) If the Offeror is the prospective awardee and is not currently an approved source cited in the procurement item description (PID) on the schedule page of this solicitation, the Offeror will be requested by the Contracting Officer to provide documented evidence prior to award sufficient to establish that the item being offered is (or will be) the exact item cited in the PID and is (or will be) manufactured by an approved source cited in the PID, modified (if necessary) to conform to any additional requirements set forth in the PID, and is (or will be) manufactured by or under the direction of an approved source cited in the PID. Additionally, if the Offeror manufactures the offered item for an approved source cited in the PID, evidence of approval and acceptance by the approved source will be required.

Evidence must include the following at a minimum, plus whatever additional evidence the Contracting Officer determines necessary to sufficiently establish the identity of the item and its manufacturing source:

(1) If offered item(s) are "not in stock" or "not yet manufactured" --

(i) A copy of Offeror's Request for Quotation to approved source cited in PID; and

(ii) An original, hard copy of quotation received by Offeror from approved source cited in PID; or other verifiable documentation of quotation. (If Offeror is unable to provide this documentation to the Contracting Officer prior to award, it must be provided to the Quality Assurance Representative (QAR) for examination at time of source inspection.)

(iii) For offers of surplus material, a completed 52.211-9000 or Procurement Note C04 with supporting documentation.

(2) If offered item(s) are "shipped" or "in stock" --

(i) A copy of invoice on approved source's letterhead. (Invoice must identify exact item cited in PID and a quantity sufficient to satisfy the solicitation requirement.); or

(ii) A copy of packing slip which accompanied shipment from approved source to Offeror. (Packing slip must identify exact item cited in PID and a quantity sufficient to satisfy the solicitation requirement; or

(iii) For offers of surplus material, a completed 52.211-9000 or Procurement Note C04 with supporting documentation; and

(iv) Inventory control records to establish that items Offeror proposes to furnish under current order are still in Offeror's stock. (This documentation is mandatory and must be provided to Quality Assurance Representative (QAR) for examination at time of source inspection. Documentation may be provided to Contracting Officer prior to award, at Offeror's discretion.)

(3) If Offeror is an authorized dealer/distributor, or manufactures the item for an approved source --

(i) An authorized dealer/distributorship agreement, licensee agreement, or other type of agreement. (The agreement must specifically identify the exact item, or otherwise ensure that the Offeror is authorized by the approved source to manufacture or distribute the exact item being acquired. If the agreement covers a general product line or is otherwise not product-specific, the Offeror must also furnish additional documentation to address the exact item being acquired (see above).); or

(ii) Letter from an approved source cited in the PID, specifically identifying Offeror as authorized to distribute or manufacture the exact item cited in the PID for that approved source; or

(iii) Other verifiable information (e.g., listing of authorized dealers on official Web page of an approved source) to establish the Offeror's authority to manufacture or distribute the exact item cited in the PID for an approved source cited in the PID.

(4) When the PID specifies a revision number --

(i) Documentation establishing that the offered item was (or will be) made in accordance with the revision cited in the PID. (This requirement is considered to have been met when documentation provided by Offeror to satisfy other portions of this clause or solicitation already establishes that offered item was (or will be) made to the revision cited in the PID); or

(ii) Documentation identifying the revision offered and the differences between the revision offered and the revision cited in the PID.

(e) By the submission of this offer, the Offeror represents that --

(1) The item(s) to be provided to the Government --

(i) Is (or will be) in full compliance with all requirements specified in the solicitation; and

(ii) Is not (or will not be) --

(A) A factory second;

(B) Changed, mutilated, or rebranded;

(C) A manufacturer's overrun;

(D) A rejected item; or

(E) Government surplus material (unless Offeror has complied with clause at DLAD 52.211-9000 or Procurement Note C04, Government Surplus Material).

(2) In the event of item failure, Offeror will have access to, and will provide to the Government upon request, all information necessary to trace the item back through the manufacturing process.

(3) Any documentation provided by Offeror will correspond to the exact item(s) that will be furnished to the Government; or Offeror will obtain updated documentation and provide it to the Government (if, for example, Offeror sells item(s) to another Buyer before award or before tender for acceptance).

(f) Failure to provide adequate documentation within the timeframe requested by the Contracting Officer may result in rejection of the offer.

CHANGES IN CONTRACTOR STATUS, ITEM ACQUIRED, AND/OR MANUFACTURING PROCESS/FACILITY

(a) Since the item being acquired is a critical safety item, the Contractor shall immediately provide notification and documentation of the changes to the Contracting Officer when any changes occur in the Contractor's business status or relationship with the approved source(s) after award of this contract (such as, for example, inability to obtain manufacturing process information; or changes in status as authorized dealer/distributor, or in terms of licensing arrangement),

(b) The Contractor shall immediately provide to the Contracting Officer notification (and documentation, if available) of any of the following changes the Contractor becomes aware of:

(1) Later revisions to drawings, specifications or standards that differ from the revision cited in the procurement item description (PID) in the contract;

(2) Changes in the manufacturing process;

(3) A change in the approved source's manufacturing location; or

(4) A transfer of manufacturing facilities by the approved source since last manufacture.

WITHHOLDING OF MATERIEL REVIEW BOARD (MRB) AUTHORITY

The item being acquired is a critical safety item. Notwithstanding any other term or condition included in this contract/agreement, Materiel Review Board (MRB) authority is hereby withheld.

(IAW FAR 29.402-3(a))

(a) *Definitions.* As used in this provision—

Foreign person means any person other than a United States person.

Specified Federal procurement payment means any payment made pursuant to a contract with a foreign contracting party that is for goods, manufactured or produced, or services provided in a foreign country that is not a party to an international procurement agreement with the United States. For purposes of the prior sentence, a foreign country does not include an outlying area.

United States person as defined in 26 U.S.C. 7701(a)(30) means—

- (1) A citizen or resident of the United States;
- (2) A domestic partnership;
- (3) A domestic corporation;
- (4) Any estate (other than a foreign estate, within the meaning of 26 U.S.C. 701(a)(31)); and
- (5) Any trust if—
 - (i) A court within the United States is able to exercise primary supervision over the administration of the trust; and
 - (ii) One or more United States persons have the authority to control all substantial decisions of the trust.

(b) Unless exempted, there is a 2 percent tax of the amount of a specified Federal procurement payment on any foreign person receiving such payment. See 26 U.S.C. 5000C and its implementing regulations at 26 CFR 1.5000C-1 through 1.5000C-7.

(c) Exemptions from withholding under this provision are described at 26 CFR 1.5000C-1(d)(5) through (7). The Offeror would claim an exemption from the withholding by using the Department of the Treasury Internal Revenue Service Form W-14, Certificate of Foreign Contracting Party Receiving Federal Procurement Payments, available via the internet at www.irs.gov/w14. Any exemption claimed and self-certified on the IRS Form W-14 is subject to audit by the IRS. Any disputes regarding the imposition and collection of the 26 U.S.C. 5000C tax are adjudicated by the IRS as the 26 U.S.C. 5000C tax is a tax matter, not a contract issue. The IRS Form W-14 is provided to the acquiring agency rather than to the IRS.

(d) For purposes of withholding under 26 U.S.C. 5000C, the Offeror represents that—

- (1) It [] is [] is not a foreign person; and

(2) If the Offeror indicates “is” in paragraph (d)(1) of this provision, then the Offeror represents that—

I am claiming on the IRS Form W-14 [] a full exemption, or [] partial or no exemption
[Offeror shall select one] from the excise tax.

(e) If the Offeror represents it is a foreign person in paragraph (d)(1) of this provision, then—

- (1) The clause at FAR 52.229-12, Tax on Certain Foreign Procurements, will be included in any resulting contract; and
- (2) The Offeror shall submit with its offer the IRS Form W-14. If the IRS Form W-14 is not submitted with the offer, exemptions will not be applied to any resulting contract and the Government will withhold a full 2 percent of each payment.

(f) If the Offeror selects “is” in paragraph (d)(1) and “partial or no exemption” in paragraph (d)(2) of this provision, the Offeror will be subject to withholding in accordance with the clause at FAR 52.229-12, Tax on Certain Foreign Procurements, in any resulting contract.

(g) A taxpayer may, for a fee, seek advice from the Internal Revenue Service (IRS) as to the proper tax treatment of a transaction. This is called a private letter ruling. Also, the IRS may publish a revenue ruling, which is an official interpretation by the IRS of the Internal Revenue Code, related statutes, tax treaties, and regulations. A revenue ruling is the conclusion of the IRS on how the law is applied to a specific set of facts. For questions relating to the interpretation of the IRS regulations go to <https://www.irs.gov/help/tax-law-questions>.

NOTICE ON THE USE OF THE SUPPLIER PERFORMANCE RISK SYSTEM

(MAR 2023)

(IAW DFARS 204.7604)

(a) *Definitions.* As used in this provision—

Item risk means the probability that a product, based on intended use, will introduce performance risk resulting in safety issues, mission degradation, or monetary loss.

Price risk means a measure of whether a proposed price for a product or service is consistent with historical prices paid for that item or service.

Supplier risk means the probability that an award may subject the procurement to the risk of unsuccessful performance or to supply chain risk (see Defense Federal Acquisition Regulation Supplement 239.7301).

(b) The Supplier Performance Risk System (SPRS), available at <https://piee.eb.mil/>, will be used in the evaluation of the Quoter or Offeror's performance. SPRS retrieves item, price, quality, delivery, and contractor information on contracts from Government reporting systems in order to develop risk assessments.

(c) The Contracting Officer will consider SPRS risk assessments during the evaluation of quotations or offers received in response to this solicitation as follows:

(1) Item risk will be considered to determine whether the procurement represents a high performance risk to the Government.

(2) Price risk will be considered in determining if a proposed price is consistent with historical prices paid for a product or a service or otherwise creates a risk to the Government.

(3) Supplier risk, including but not limited to quality and delivery, will be considered to assess the risk of unsuccessful performance and supply chain risk.

(d) SPRS risk assessments are generated daily. Quoters or Offerors are able to access their risk assessments by following the access instructions in the SPRS user's guide available at <https://www.sprs.csd.disa.mil/reference.htm>. Quoters and Offerors are granted access to SPRS for their own risk assessment classifications only. SPRS reporting procedures and risk assessment methodology are detailed in the SPRS user's guide. The method to challenge a rating generated by SPRS is also provided in the user's guide. SPRS evaluation criteria are available at https://www.sprs.csd.disa.mil/pdf/SPRS_DataEvaluationCriteria.pdf.

(e) The Contracting Officer may consider any other available and relevant information when evaluating a quotation or an offer.

Offerors shall assume that the Government has no prior knowledge of their facilities and experience, and will base its evaluation on the information presented in the offeror's proposal. Elaborate brochures or documentation, binding, detailed artwork, or other embellishments are unnecessary and are not desired.

1.3 Proposal Acceptance Period

The proposal acceptance period is specified in the solicitation. The offer shall make a clear statement in the proposal documentation volume that the proposal is valid until this date.

1.4 Retention of Proposals

In accordance with FAR Subpart 4.8 (Government Contract Files), the Government will retain one copy of all unsuccessful proposals. Unless the offer requests otherwise, the Government will destroy extra copies of such unsuccessful proposals.

2.2 Debriefings

The KO will promptly notify offerors of any decision to exclude them from the competitive range, whereupon they may request and receive a debriefing in accordance with FAR 15.505. Offerors excluded from the competitive range may request a pre-award debriefing or they may choose to wait until after the source selection decision to request a post-award debriefing. However, offerors excluded from the competitive range are entitled to no more than one debriefing for each proposal. The KO will notify unsuccessful offerors in accordance with FAR 15.503. Upon such notification, unsuccessful offerors may request and receive a debriefing. Offerors desiring a debriefing must make their request in accordance with the requirements of FAR 15.505 or 15.506, as applicable.

If an offeror believes that the requirements in these instructions contain an error, omission, or are otherwise unsound, the offeror shall immediately notify the KO in writing with supporting rationale as well as the remedies the offeror is asking the KO to consider as related to the omission or error. The offeror is reminded that the Government reserves the right to award this effort based on the initial proposal, as received, without discussions.

2.4 Electronic Reference Documents

All referenced documents for this solicitation are available on the Beta Sam Website under Contract Opportunities at <https://www.sam.gov/>, unless indicated otherwise. Potential Offerors are encouraged to subscribe for real-time e-mail notifications when information has been posted to the website for this solicitation.

3.6	Exceptions to Terms and Conditions (if applicable)

An offer may be made in accordance with a current Department of Defense (DoD) Basic Ordering Agreement (BOA), if lieu of the signed Model Contract. However, eligibility for award will be dependent upon the KO's ability to make a determination that the terms and conditions are either identical to those of the solicitation or differ in a way that has no impact on the evaluation factors listed. The offeror is responsible for identifying the differences or exceptions between the BOA and the RFP as detailed in paragraph (2) Exceptions to Terms and Conditions below. If the Contracting Officer cannot make the determination above, the BOA offer may not be eligible for award.

FAR 15.403-3(a)(1) provides for obtaining information other than certified cost or pricing data if needed to determine price reasonableness. Therefore, the FAR does not preclude the requirement for obtaining other than certified cost or pricing data under certain circumstances and the Government reserves the right to obtain data as appropriate. Should the contracting officer determine proposed prices to appear unreasonable or the possibility that an Offeror does not fully understand the requirement, the Offerors may be required to support price reasonableness via other than certified cost or pricing data. If, after receipt of proposals, the contracting officer determines that there is insufficient information available to determine price reasonableness and none of the exceptions in FAR 15.403-1 apply, the offeror shall be required to submit certified cost or pricing data.

3.4 Past Performance (Evaluation Factor 3) Information

3.4.1 General Information

The offeror is not required to provide past performance information, however they may submit it with their proposal in a format that is readable and that communicates in a clear and concise manner. If the offeror submits past performance information, the submittal should contain information on the offeror and/or all significant subcontractors. A significant subcontractor is defined as a contractor who is proposed to perform over 60% of the total effort.

The Government may use past performance information provided by each offeror and information obtained from other sources in the evaluation of past and present performance. Other sources include the Supplier Performance Risk System (SPRS). Past performance may also be obtained through the contractor Performance Assessment Reporting System (CPARS), similarly systems of other Government departments and agencies (MOCAS, etc), Defense Contract Management Agency (DCMA) channels, interviews with program managers and contracting officers, and other sources known to the Government, including commercial sources.

3.4.2 Relevant and Recent Contracts

Each offeror may submit information on past and present performance that they consider most relevant in demonstrating their ability to perform the proposed effort. Offerors may also include information on recent contracts performed by each of their significant subcontractors that they consider most relevant in demonstrating their ability to perform the proposed effort. For description of the characteristics or aspects the Government will consider in determining relevance, see Section M (or addendum to FAR 52.212-2 if commercial). Information on past and present performance should be limited to contracts within the past seven (7) years.

If the offeror submits past performance reference for a significant subcontractor, the offeror must submit a consent letter (Attachment (insert number)) executed by each significant subcontractor, authorizing release of adverse past performance information to the offeror so the offeror can respond to such information. For each identified effort for a commercial customer, the offeror must also submit a client authorization letter (Attachment (insert number)) authorizing release to the Government of requested information on the offeror's performance.

3.4.3 Specific Content

Offerors may explain what aspects of the contracts are deemed relevant to the proposed effort, and to what aspects of the proposed effort they relate. This may include a discussion of efforts accomplished by the offeror to resolve problems encountered on prior contracts as well as past efforts to identify and manage program risk. Merely having problems does not automatically equate to a little or no confidence rating, since the problems encountered may have been on a more complex program, or an offeror may have subsequently demonstrated the ability to overcome the problems encountered. The offeror may submit documentation that clearly demonstrates their management actions employed in overcoming problems and the effects of those actions, in terms of improvements achieved or problems rectified. This may allow the offeror to be considered a higher confidence candidate.

3.4.4 Format and Length of Documentation

Documentation is limited to addressing up to 5 contracts. Each contract that is addressed is also limited to a one (1) page narrative concerning subject contract.

3.4.5 Protection of Information

Past performance information and the past performance sources are confidential and are not to be released to anyone outside the government source selection team. Offerors are cautioned that contacting or seeking our source(s) of adverse information is strictly prohibited. Any attempts to contact individuals concerning the past performance information will be perceived negatively and could impact your performance ratings. Any questions regarding source selection information and Evaluation Notices (ENs) should be addressed directly to the contracting officer only and not to any other individuals. Prime contractors are responsible for ensuring that all their subcontractors and teaming partners are aware of this information and are in compliance.

3.5 Other Information Required

3.5.1 Authorized Offeror Personnel

Provide the name, title and telephone number of the company/division point of contact regarding decisions made with respect to your proposal and who can obligate your company contractually. Also, identify those individuals authorized to negotiate with the Government.

3.5.2 Government Offices

Provide the mailing address, telephone and fax numbers and facility codes for the cognizant Contract Administration Office, DCAA, and Government Paying Office. Also, provide the name and telephone and fax number for the Administrative Contracting Officer (ACO).

3.5.3 Company/Division Address, Identifying Codes, and Applicable Designations

Provide company/division's street address, county and facility code; CAGE code; DUNS code; TIN; size of business (large or small); and labor surplus area designation. This same information must be provided if the work for this contract will be performed at any other location(s). List all locations where work is to be performed and indicate whether such facility is a division, affiliate, or subcontractor, and the percentage of work to be performed at each location.

3.6 Exceptions to Terms and Conditions

Exceptions taken to terms and conditions of this prospective contract, to any of its formal attachments or to other parts of the solicitation shall be identified. Each exception shall be specifically related to each paragraph and/or specific part of the solicitation to which exception is taken. Provide rationale in support of the exception and fully explain its impact, if any, on the performance, schedule, cost and specific requirements of the solicitation. This information shall be provided in the format shown below. Failure to comply with the terms and conditions of the solicitation may result in the offeror being removed from consideration for award.

ATTACHMENT 0001

SIGNIFICANT SUBCONTRACTOR/TEAMING PARTNER CONSENT FORM FOR THE RELEASE OR PAST AND PRESENT PERFORMANCE INFORMATION TO THE PRIME CONTRACTOR

Past performance information concerning subcontractors and teaming partners cannot be disclosed to a private party without the subcontractor's or teaming partner's consent. Because a prime contractor is a private party, the Government will need that consent before disclosing subcontractor/teaming partner past and present performance information to the prime during exchanges. In an effort to assist the Government's Past Performance Evaluation in assessing your past performance relevancy and confidence, we request the following consent form be completed by significant subcontractors/teaming partners identified in your proposal. The completed consent forms should be submitted with your proposal.

SECTION M
EVALUATION FACTORS FOR AWARD
PAST PERFORMANCE and PRICE TRADEOFF

1.0 Source Selection

1.1 Basis for Contract Award

This acquisition will utilize the Tradeoff source selection procedures to make an integrated assessment for a best value award decision. Tradeoffs may be made only between price and past performance. Award will be made to the offeror who is deemed responsible in accordance with the Federal Acquisition Regulation (FAR) Part 15, as supplemented, whose proposal conforms to the solicitation's requirements (to include all stated terms, conditions, representation, certifications, its attachments, and all other information required by Section L of this solicitation) and judged, based on the evaluation factors to represent the best value to the Government. The Government seeks to award to the qualified (See FAR 52.209-1 of this solicitation) offeror who gives the Government the greatest confidence that they will best meet the requirement affordably. This may result in an award to a higher rated, higher priced offeror, where the decision is consistent with the evaluation factors and the Source Selection Authority (SSA) reasonably determines that the past performance of a higher price offeror outweighs the cost difference. While the Government SSA will strive for maximum objectivity, the source selection process, by its nature, is subjective and, therefore, professional judgment is implicit throughout the entire process.

1.2 Number of Contracts to be Awarded

The Government intends to award one contract for this acquisition resulting from this solicitation. However, the Government reserves the right not to award a contract at all, depending on the quality of the proposals and prices submitted and the availability of funds.

1.3 Rejection of Unrealistic Offers

The Government may reject any proposal that is evaluated to be unrealistic in terms of program commitments, including contract terms and conditions, or unrealistically high or low in cost/price when compared to Government estimates, such that

the proposal is deemed to reflect an inherent lack of competence or failure to comprehend the complexity and risks of the program.

1.4 Correction Potential of Proposals

The Government will consider, throughout the evaluation, the "correction potential" of any deficiency or proposal inadequacy. The judgment of such "correction potential" is within the sole discretion of the Government. If an aspect of an offeror's proposal not meeting the Government's requirements is not considered correctable, the offeror may be eliminated from the competitive range.

1.5 Discussions

It is the Government's intent to award without discussions; therefore, it is imperative that offerors submit their best terms initially. However, if during the evaluation period, it is determined to be in the best interest of the Government to hold discussions, offeror responses to Evaluation Notices (ENs), and the Final Proposal Revision (FPR) will be considered in making the source selection decision.

1.6 Competitive Range Determination

If discussions are conducted, the Government shall establish a competitive range comprised of the most highly rated proposals, in accordance with FAR 15.306(c). The competitive range determination can be based on any evaluation factor, or a combination of the three factors. A competitive range determination may eliminate Offerors based on their initial proposal evaluation results, after discussions (if necessary), prior to issuance of the Final Proposal Revision (FPR) request, or for efficiency. If Offerors are excluded from the competitive range they may request a debriefing IAW FAR 15.505.

1.7 Pre-Award Survey

The Government may conduct a pre-award survey (PAS) as part of this source selection. Results of the PAS (if conducted) will be evaluated to determine each offeror's capability to meet the requirements of the solicitation.

1.8 Solicitation Requirements (Terms and Conditions)

Offerors are required to meet all solicitation requirements, such as terms and conditions, and representations and certifications, in addition to those identified as factors. Failure to comply with the terms and conditions of the solicitation may result in the Offeror being ineligible for award. Offerors must clearly identify any exception to the solicitation terms and conditions and must provide complete supporting rationale. The Government reserves the right to determine any such exceptions unacceptable, and the proposal, therefore, ineligible for award.

2.0 EVALUATION FACTORS

2.1 Evaluation Factors

Award will be made to the offeror proposing the combination most advantageous to the Government based upon an integrated assessment of the evaluation factors and subfactors described below.

Factor 1: Technical

Factor 2: Price

Factor 3: Past Performance

2.2 Relative Importance of Factors

For this solicitation, technical acceptability is a prerequisite to the best value analysis and potential trade-off between Past Performance and Price. The Order of Importance is used to explain how the other factors will be traded off on technically acceptable proposals.

For all technically acceptable proposals, Factor 2 (Price) will be evaluated on a basis approximately equal to Factor 3 (Past Performance). Tradeoffs may only be made between past performance and price among those offerors who have been determined technically acceptable.

2.3 Evaluation Methodology of Factors

All proposals will first be evaluated for technical acceptability as described in paragraph 2.3.1 below. Second, price will be evaluated as described in paragraph 2.3.2 below. Concurrent with the price evaluation, past performance will be evaluated in accordance with paragraph 2.3.3 on each proposal deemed technically acceptable. A decision will then be made as to which proposal provides the best value to the Government.

2.3.1 Technical Factor

There is no requirement that a technical proposal be submitted. Each offer will be determined technically acceptable if deemed compliant with specified requirements and is listed as an approved, qualified source or gains qualification prior to award. Failure to meet the specified requirements as included in Section L may render the offer technically unacceptable. Only those proposals determined to be technically acceptable, either initially, or as a result of discussions, will be considered for award. Each offeror will receive one of the technical ratings described below:

Rating	Description
Acceptable	Proposal meets the minimum requirements of the solicitation.
Unacceptable	Proposal does not meet the minimum requirements of the solicitation.

2.3.2 Price Factor

The proposed price will be evaluated for completeness, reasonableness, unbalanced pricing, and Total Evaluated Price. Offerors whose price is determined to be incomplete, unreasonable, or unbalanced will not be considered for award.

2.3.2.1 Completeness

Proposals will be reviewed for completeness and compliance. Incomplete proposals will be considered unawardable.

2.3.2.2 Price Reasonableness

The proposed prices will be evaluated for reasonableness. Analysis of price proposals will be performed using one or more of the techniques defined in FAR 15.404 in order to determine price reasonableness. Reasonableness must represent a price to the Government a prudent person would pay in the conduct of competitive business. Normally, price reasonableness is established through adequate price competition, but may also be determined through price analysis techniques as described in FAR 15.404.

2.3.2.3 Unbalanced Pricing: Offerors' proposals will be reviewed for unbalanced pricing. The Government will evaluate any supporting information provided by the Offeror explaining variances that appear unbalanced. Evaluated offers that are determined to be unbalanced may be deemed ineligible for award by the Contracting Officer if a determination is made that lack of balance poses an unacceptable risk to the Government. Unbalanced pricing exists when, despite an acceptable total price, the price of one or more line items is significantly over or understated as demonstrated by application of price analysis techniques, such that: (a) there is reasonable doubt the offer would result in the lowest overall cost to the Government, even though it is the lowest priced Offeror; or (b) the offer is so grossly unbalanced; its acceptance would be tantamount to allowing an advanced payment.

2.3.2.4 Total Evaluated Price (TEP): The Offeror's TEP will be determined by multiplying the proposed unit price by the Best Estimated Quantity (BEQ) of each contract line item (CLIN), then adding all CLINs together; however, the actual quantity awarded may differ based on the Government required quantity at award. (At award, the quantity type may be changed from BEQ to Fixed Quantity). Any price related factors (i.e. transportations costs, first article testing) will be added to the amount for its respective CLIN.

2.3.2.5 Data Other than Certified Cost or Pricing Data: If requested by the Contracting Officer, data other than certified cost or pricing data shall be evaluated to support a determination of reasonable and balanced pricing. This information will only be requested if all other sources have been insufficient to support a determination of reasonable and/or balanced pricing. However, if the contracting officer does not receive proposals from two or more responsible offerors, competing independently, the sole offeror shall be required to submit certified cost or pricing data if the proposed dollar amount exceeds the Truth in Negotiations Act (TINA) threshold IAW FAR 15.403-4 or data other than certified cost or pricing data in sufficient detail to support a determination of reasonable and balanced pricing as determined by the contracting officer if the proposed dollar amount does not exceed the TINA threshold IAW FAR 15.403-4.

2.3.3 Past Performance Factor

The Government will evaluate the offeror's past performance by reviewing the offeror's record of supplying products that comply with contract requirements, including cost and schedule. Under the Past Performance factor, a Performance Confidence Assessment Rating represents the evaluation of an offeror's present and past work record to assess the Government's confidence in the offeror's probability of successfully performing as proposed.

2.3.3.1 Evaluation Process

The Past Performance Evaluation is accomplished by reviewing aspects of an offeror's (1) relevant past performance and (2) recent past performance, focusing on and targeting performance, which is relevant to the technical requirement. In

determining relevance, consideration will be given to the likeliness and similarity of the effort to include contract scope, contract type, and contract schedule. This information may include data on parts manufactured by other divisions, critical subcontractors, or teaming contractors, if such resources significantly influence the proposed requirement. The Government may consider relevant work as those performed for agencies of the federal, state, or local governments and commercial customers. Where relevant performance record indicates performance problems, the Government will consider the number and severity of the problems and the appropriateness and effectiveness of any corrective actions taken (not just planned or promised). The Government may review more recent contracts or performance evaluations to ensure corrective actions have been implemented and to evaluate their effectiveness. To be recent, contract delivery must have occurred within the past seven (7) years from the date of issuance of this solicitation. Past performance information that fails this condition will not be evaluated.

Offerors with adverse past performance information to which they have not previously had an opportunity to respond will be given the opportunity to provide clarifications concerning the adverse information.

Past performance information will be determined primarily based on the offeror's "Supplier Risk Score" in the Supplier Performance Risk System (SPRS) at the time of the close of the solicitation period.

Past performance may also be obtained through information provided by the offerors, the contractor Performance Assessment Reporting System (CPARS), similarly systems of other Government departments and agencies (MOCAS, etc), questionnaires tailored to the circumstances of this acquisition, Defense Contract Management Agency (DCMA) channels, interviews with program managers and contracting officers, and other sources known to the Government, including commercial sources. Offerors are to note that, in conducting this assessment, the Government reserves the right to use both data provided by the offeror and data obtained from other sources.

2.3.3.2 Past Performance Ratings

Each offeror will receive an integrated Performance Confidence Assessment rating, which is the rating for the Past Performance factor. Although the past performance evaluation focuses on performance that is recent and relevant to the technical requirement, the resulting Performance Confidence Assessment is made at the factor level and represents an overall evaluation of contractor performance. The Past Performance factor will receive one of the following performance confidence assessment ratings in accordance with the Department of Defense (DoD) Source Selection Procedures.

Rating	Description
SATISFACTORY CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort.
NEUTRAL CONFIDENCE	No recent/relevant performance record is available or the offeror's performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The offeror may not be evaluated favorably or unfavorably on the factor of past performance.
LIMITED CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has a low expectation that the offeror will successfully perform the required effort.
NO CONFIDENCE	Based on the offeror's recent/relevant performance record, the Government has no expectation that the offeror will be able to successfully perform the required effort.

Note: With regards to the best value award decision, all offerors receiving the same past performance rating will be considered equal for the Past Performance Factor.

More recent and relevant performance will have a greater impact on the Performance Confidence Assessment than less recent or relevant effort. A strong record of relevant past performance may be considered more advantageous to the Government than a "Neutral Confidence" rating. Likewise, a more relevant past performance record may receive a higher confidence rating and be considered more favorably than a less relevant record of favorable performance.

Offerors without a record of relevant past performance or for whom information on past performance is not available will not be evaluated favorably or unfavorably on past performance and, as a result, will receive a "Neutral confidence" rating for the Past Performance factor.

If the starting material or raw stock is processed in a manner that will not affect its chemical composition or mechanical properties (e.g. machining), the original mill certification is acceptable. Recertification of the mechanical properties or chemical composition is required if a metal working process, heat treatment or alloying used during fabrication alters the original condition of the material. The mechanical properties or chemical composition of the material must be re-determined and be representative of the altered condition. The altered mechanical properties or chemical composition must be within specification and be part of the certification data submitted to the government. The altered material shall be uniquely re-identified (marked), and traceable to certification data.

6. Foreign Certification. In addition to the paragraph 4 data format requirements, country of origin shall be identified. Foreign languages on the certifications must be translated into English. The units of measure must be the same as those required by the contract or specification. Those units of measure not in conformance with the contract or specification must be converted. Translations and conversions may be annotated on the certifications, if space permits, or placed in an addendum in the same format as the foreign certification data. Such translation or conversion shall remain traceable to the material and be identified as to origin with name, title, signature, and date of the authorized representative of the company making the translation or conversion.

7. Signature. The Certification Report shall contain the signature of the contractor's authorized representative responsible for ensuring that the equipment being delivered/service being performed is in accordance with contract requirements. Electronic signatures are acceptable provided they meet additional requirements of this DID.
